

Remarks

The claims were amended in accordance with the amendments above. The amendments to the claims are being made merely to clarify the invention. All of the amendments are fully supported by the specification, claims, and figures as originally filed. No new matter is believed or intended to be involved.

Advisory Action

In response to the Final Office Action dated 01/13/2009, Applicant filed an Amendment After Final on 03/23/2009. In the Advisory Action dated 04/09/2009, the Office refused to enter the 03/23/2009 Amendment After Final. In particular, the Office stated that the Amendment After Final raised new issues and raised the issue of new matter. While Applicant disagrees with the Office's positions in the Advisory Action, the present amendments include amendments to the claims that differ from those presented in the 03/23/2009 Amendment After Final. Without admitting the propriety of the Office's position in the Advisory Action, Applicant submits that the claims as presently amended sufficiently address the issues raised by the Office in both the Final Office Action dated 01/13/2009 and the Advisory Action dated 04/09/2009.

§112 Rejections

In the Office Action dated 01/13/2009, claims 1, 3, 4, 6-9, 11-24, 27-28, and 32-47 were rejected under 35 U.S.C. §112, first paragraph, as failing to comply with the written description requirement. In particular, the Office stated that the limitation in claim 1 reciting a tether that "comprises a tube configured to replenish the core" lacked adequate support in the original disclosure. The Office noted that FIG. 16 and paragraph [0098] of Applicant's disclosure discusses such a tube tether when a reservoir is present. In the Advisory Action dated 04/09/2009, the Office stated that the core and the reservoir were separate entities within the device.

Claim 1 has been amended to separate the recitations of the reservoir and the core, and to recite that the tube of the tether is configured to replenish the reservoir. These recitations are clearly supported by at least FIGS. 15-16 and paragraphs [0097]-[0098] of Applicant's original disclosure. For at least the foregoing reasons, Applicant respectfully submits that amended claim

1 and Applicant's original disclosure satisfy the written description requirement of §112, and that the present amendments to claim 1 do not add any new matter. Applicant therefore respectfully requests that the rejection be withdrawn.

Non-Elected Claims

The Office noted that the application contains claims 10, 25, 26, 29, and 30, which were drawn to a non-elected invention. The Office further stated that a complete reply must include cancellation of non-elected claims or other appropriate action in accordance with 37 CFR §1.144 and MPEP 821.01.

Claims 10 and 25-26 have been canceled. Claims 29-30 are not being canceled because they are eligible for rejoinder. See MPEP 821.04. In particular, claims 29-30 have been amended to depend from claim 1, and therefore include all of the limitations of claim 1. Since amended claim 1 is now in condition for allowance, and to the extent that the Office sees no formal or substantive defects in claims 29-30, claims 29-30 should be rejoined and allowed in accordance with MPEP 821.04.

Status of Figure 16

The Office further stated that FIG. 16 was missing from the file, and that the drawings end at FIG. 15. The Office stated that a new copy of FIG. 16 should be presented. Applicant notes that FIG. 16 was in fact included with Applicant's original filing of the present application. In particular, FIG. 16 appears in the corner on the last sheet of drawings (next to FIG. 14), as shown in the below copy (i.e., beginning on the next page of these Remarks) of the last sheet of drawings that were originally filed with the present application.

FIG. 16 is right here in  
the corner of the last page  
of drawings.

FIG. 16

FIG. 14

FIG. 13

FIG. 15

11/11

The above copy of the last sheet of drawings originally filed with the present application was downloaded directly from PAIR, such that it is indeed "of record" in the present application. It appears as though the arrangement of the drawings on the last sheet of drawings originally filed with the present application created an appearance that FIG. 15 was the last drawing. However, as shown in the above copy of the last sheet of drawings originally filed with the present application, FIG. 16 was indeed included in the drawings originally filed with the present application. Applicant therefore respectfully requests that the Office acknowledge that FIG. 16

was included with the drawings originally filed with the present application; and Applicant respectfully submits that FIG. 16 does not need to be re-submitted.

Conclusion

Applicant expressly reserves all rights and arguments with respect to distinctions not explicitly noted herein. In addition, to the extent that the amendments constitute a narrowing of the claims, such narrowing of the claims should not be construed as an admission as to the merits of the prior rejections. Indeed, Applicant traverses the rejections and preserves all rights and arguments. To the extent that any particular statement or argument by the Office in the pending Office Action has not been explicitly addressed herein, the same should not be construed as an acquiescence or admission by the Applicant that such statements or arguments by the Office are accurate or proper.

Based on the foregoing, all pending claims are in a condition for allowance. Accordingly, Applicant respectfully requests reconsideration and an early notice of allowance. Should the Examiner wish to discuss the amendments or arguments made herein, Applicant invites the Examiner to contact the undersigned at (513) 369-4811 or via e-mail at [aulmer@fbtlaw.com](mailto:aulmer@fbtlaw.com).

The Commissioner for Patents is hereby authorized to charge any deficiency, including any fees required for an extension of time not already paid for or any other required fees not already paid for, or to credit any overpayment of fees, to Frost Brown Todd LLC Deposit Account No. 06-2226.

Respectfully Submitted,

Andrew B. Ulmer (Reg. No. 57,003)
